The Welland Canal: Connecting the Great Lakes

Creation of the Canal

The Welland Canal is an important shipping lane, allowing large ships to travel between Lakes Erie and Ontario, bypassing the dangerous rapids and falls of the Niagara River. Way back in 1824, work started on the Canal, and since then, four slightly different routes have been constructed. Some of the

older routes now serve as recreational waterways for boating and swimming, and the present canal route runs north/south on the east side of the city. With the Welland River also bisecting Welland, water and waterside parks play a big role in the city, presenting easy escapes to nature close to home.

HISTORY

The big dig

The Welland Canal has gone through four redos, with four slightly different routes winding their way between Lake Ontario and Lake Erie.

1829

AFTER 5 YEARS OF CONSTRUCTION, THE FIRST WELLAND CANAL OPENED. THE SCHOONER ANNE & JANE WAS THE FIRST VESSEL TO TRAVEL THROUGH THE CANAL.

1882

THE CANAL REOPENED AFTER BEING DEEPEMED AND WIDENED IN ORDER TO ACCOMMODATE WIDER SHIPS WITH HEAVIER LOADS.

1887

THE CANAL WAS RECONFIGURED WITH A NEW SHORTER ALIGNMENT COMPLETED BETWEEN ST. CATHARINES AND PORT DALHOUSIE.

Today’s canal was built between the periods of 1913–1932, with an interruption during World War I, when there weren’t enough men to work on it. This was a completely different route, with only 8 locks, making transit faster through the canal.
